

OPEN MAPPING
KÜZEFEST

GRID

- Working resolution: 1280x800 px, square pixels. Duration: For video, must last between 30 seconds to 3 minutes. For stillmapping, 6 photos maximum.
- Quicktime Photo Codec – JPEG or HAP.
- **MAC_Grid3D.fbx** file includes 3d model of the building and camera.
- Use **MAC_Grid2D.png** as a second layer with transparency as the building reference (do not forget to turn this layer off when exporting the video).
- Place **MAC_MASK.png** as the first layer and lock.

PRECAUTIONS

- Do not move the camera from the 3d file.
- Do not place important information over the building windows.
- Do not use the area with the name of the museum (it is black and cannot see it in the projection).
